The Emotional Tone Scale How often have you heard someone say, I don't understand him? Sometimes irrational, unforeseen acts seem to be the norm among our fellows. The fact is, there has never been a workable method to invariably predict human behavior until now. L. Ron Hubbard developed just such a method, and it is applicable to all people, without exception. With this data, it is possible to accurately predict the behavior of a potential business partner, employee or friend before you commit to a relationship. The risks involved in human interaction can be avoided or minimized when you can predict how people will behave. By understanding and using the information in this booklet, all aspects of human relationships will become more productive and more fulfilling. You'll know who to associate with, who to avoid, and you will be able to help those who are mired in uncomfortable situations with others. Imagine knowing, after a very short time, how people are likely to behave in any given circumstance. You can. Do you feel let down by others? Who do you trust and how do you know who to avoid? How can you better predict behavior? For the solutions and answers to these situations, buy and read this booklet. This item ships from multiple locations.
